Bring the Blobbies™ into your home!

Follow these steps to create a folder that uses a Blobby™ icon:

Note: When you click download, two of the same icon sets are automatically stored into your computer.
For Mac users, only '.ICNS' files are applicable to your system.
For Windows users, only '.ICO files are applicable to your system.
Ensure that you have selected the right folder, and you are on your way to a computer full of Blobbies™!

i. Mac Users

1. Select a Blobby™ graphic to use for an icon.

2. Copy the specific Blobby™ graphic to the Clipboard by choosing Copy from the Edit menu.

3. In the Finder, select any icon you wish to change to the Blobby™ icon you copied.

4. Choose Get Info from the File menu.

5. Ensure that the Locked checkbox at the bottom of the General tab in the Get Info window is not checked. You cannot customize the icon of a locked file.

6. Click the icon at the upper-left of the Get Info window or press the Tab key to select it.

7. Choose Paste from the Edit menu.

8. Click the Close box to close the Get Info window.

9. Now, you have a Blobby™ icon!

ii. Windows User

1. Right-click on a folder (you wish to change) and choose "Properties".

2. When the "Properties" multi-tabbed dialog appears, select "Customize".

3. Click the "Change Icon" button.

4. Click "Browse" to search your system for other icons. Look for .ICO files on your system for the downloaded Blobby™ icons.

5. Press "OK" to close the dialog box.

6. Now, you have a Blobby™ icon!

Do note that you may need to close, reopen, right-click and click refresh or F5 for the icon change to take effect.
